12.0. General Rules

LC rule interpretations 12.0. General Rules

Serials Issued in Cumulations: Some serials issued in cumulations have a publication pattern whereby the individual issues for a certain period are rearranged, corrected, and perhaps expanded and reissued as a cumulation that may or may not have the same title as the individual issues. The contents of the individual issues and the cumulation are basically the same. However, these cumulations should not be confused with other serials that are publications with different frequencies and entirely different contents although the titles may be the same, e.g., an annual publication that gives the total figures for the year but does not include the monthly figures that appeared in the individual monthly issues. Separate records are generally made for these latter publications unless the numbering system ties them together.

Below are some criteria that can be used to determine when separate records should be made for such cumulations.

1) Separate records are generally made if

a) the individual issues and the cumulation have the same title but have different numbering systems, e.g., the individual issues have numeric designations but the cumulation has only a chronological designation.

*This chapter included LC rule interpretation and CONSER Standard Record (CSR) Documentation on CSR Practice at the beginning of each rule#.

When using copy, all elements that are not incorrect should be left in the record, even if they are not part of the required element set of CSR. Elements that are not obviously incorrect should, in general, also be left in the record without further research. Further guidance is in CONSER Standard Record Documentation. Appendix A.
b) the individual issues and the cumulation have different titles and separate numbering systems.

2) Separate records are generally not made if

   a) the individual issues and the cumulation have a continuous numbering system; the cumulation may or may not have a different title.

   b) the individual issues and the cumulation have the same title, have only chronological designations, and the cumulation is published in lieu of the last individual issue.

3) Whenever in doubt, prefer separate records.

**Serials Issued in Parts:** For serials issued in parts, the criteria listed below can be used to determine when separate records are made and when they are not.

Separate records are generally made if

   a) the individual parts are unnumbered or otherwise undesignated as parts of one serial.

   245 00 $a Gifu Daigaku Kyōiku Gakubu kenkyū hōkoku. $p Shizen kagaku.

   245 00 $a Nonmunjip. $p Chayôn kwahak p’yôn.
   245 00 $a 論文集. $p 自然 科學 篇.

   b) the individual parts have their own numbering system or date designation.

   245 00 $a 生物學文摘. $n 第 3 分冊. $p 微生物學
c) the parts can be purchased separately.

Separate records are generally not made if

a) the individual parts do not have a numbering system that relates to the serial as a whole.

b) the parts have a continuous pagination or enumeration.

c) the parts cannot be purchased separately.

d) the parts appear to be designed to be used together.
Whenever in doubt, prefer separate records.

Reprinted Issues of Non-Newspaper Serials:

1) Separate records are generally made for reprinted serials if the reprinted issues are published by a publisher not responsible for the original.

245 00 $a Chosŏn yŏn’guyŏn.
245 00 $a 조선어 연구
2) Separate records are generally not made for reprinted serials if the serial issues are reprinted by the publisher of the original. If these issues carry a different or an additional title, add a note on the record for the original and provide an added entry.

*LC practice:* When the Library of Congress acquires reprinted issues of a serial title to fill in gaps in its holdings of the original, a separate bibliographic record for the reprinted issue(s) will not be created.

See *LCRI 1.0* for guidelines about cataloging a reprint of serial issues as a serial or as a monograph. See *LCRI 12.0B1* for information about the basis of description for reprints of printed serials.

12.0A. Scope

12.0A1. The rules in this chapter cover the description of continuing resources, whether successively issued (i.e., serials) or integrating (e.g., updating loose-leaves, updating Web sites). . .

*Editor’s Note:* This document provides CJK examples for serials only. Non-Roman parallel fields are either mandatory or optional, following the guidelines given in CONSER EDITING GUIDE Appendix O (2009). Mandatory fields are: 245, 246, 250, 260, 362, and 4xx. Optional fields are: 1xx (name, uniform title), 240 (uniform title), 5xx, 6xx (name, uniform title), 7xx (name, uniform title, and linking fields), 8xx (name, uniform title). And 8xx (name, uniform title).

12.0B Sources of information

12.0B1 Basis of the description

a) Serials. Base the description of a serial on the first issue or part or, lacking this, on the earliest available issue or part. For numbered serials, the first issue or part is the lowest numbered issue or part. For unnumbered serials, the first issue or part is the issue or part with the earliest publication, distribution, etc., date. Generally prefer the first (or earliest) issue or part over a source associated with the whole serial or with a range of more than one issue or part.
**LC rule interpretations 12.0B1.**

**First Issue:** The basis for the description is the first issue of the serial. In determining which issue is first, disregard the date of publication, etc., and use the designation on the issues. For serials that carry numeric or alphabetic designations, the first issue is the one with the lowest or earliest (in the alphabet) designation. For serials that do not carry numeric or alphabetic designations, the first issue is the one with the earliest chronological designation. (If the actual first issue is not available, use these same guidelines to determine which issue should be used as the basis for the description.).

Serials may be issued with terms such as "premier," "sample," or "preview." The term "premier" generally implies the first true issue. Do not, however, base the description on an issue that bears only wording such as "Sample," "Preview," or "Introductory issue." Such wording generally indicates that the publisher is testing the potential audience for the serial and it is possible that the serial may never be published. Such issues generally do not have numbering. An issue that bears numbering that precedes "1," such as "Vol. 1, no. 0," "No. 0," or "Vol. 0," may be treated as the first issue, provided that there is clear evidence that the issue is not merely serving as a sample or introductory issue.

**LC practice:** The National Serials Data Program (NSDP) creates records for sample issues in order to assign the ISSN. If LC later catalogs the serial, the description is based on the first "true" issue and a note is given to explain the sample issue.

**CONSER Cataloging Manual (CCM) 8.5.3.**

**Premier or introductory issues:** If the first issue is called "premier issue" or another term designating "first," use the term in the designation only when there is no other numerical or chronological designation that can be used (see also CCM 3.1.2.). (LCRI 12.3B1.)
When words alone such as "Premier issue" have been used as the designation, change the designation to reflect later issues when possible.

515 ## $a First issue lacks numbering and is called “ch’angganho.”
515 ## $a First issue lacks numbering and is called “창간호.”

**LC rule interpretations 12.0B1.**

**Reprints of Serials:** In order that the description of the reprint resemble and file with the description of the original, the earliest issue reprinted is used as the chief source for the first three areas of the description. Data for these areas may be taken from any place on the reprinted issue without the use of brackets. If it is known that the description of the original would include data that are not on the reprinted issue, the data may be supplied in brackets.

In the publication, distribution, etc. area the place of publication, publisher, and date of the reprint are recorded, using brackets if the data do not come from a prescribed source on the reprint.
The physical description area gives the physical description of the reprint, not the original. A series is recorded if the reprint appears in a series.

Usually a single note gives important details about the original while other notes give necessary information about the reprint. Notes giving the sources of the title or the issue on which the description is based are not given.

12.0B2. Chief source of information

a) Printed resources. The chief source of information is the title page or the title page substitute. The title page substitute for an item lacking a title page is (in this order of preference) the analytical title page, cover, caption, masthead, editorial pages, colophon, other pages. Specify the source used as the title page substitute in a note (see 12.7B3). If information traditionally given on the title page is given on facing pages, with or without repetition, treat the two pages as the title page.

12.0F Inaccuracies
For inaccuracies in the title proper, see 12.1B1. For other inaccuracies, see 1.0F.

1.0F1. In an area where transcription from the item is required, transcribe an inaccuracy or a misspelled word as it appears in the item. Follow such an inaccuracy either by [sic] or by i.e. and the correction within square brackets. Supply a missing letter or letters in square brackets. For inaccuracies in the title proper of a serial or an integrating resource, see 12.1B1.
12.0H. Items with several chief source of information. See 1.0A3.

1.0A3. Chief source of information.
For situations other than a single-part bibliographic resource with only one chief source of information, apply the following guidelines when the bibliographic resource is:

i) In one physical part with more than one possible chief source of information use the first occurring source of information as the chief source of information unless one of the following applies:

ii) If the bibliographic resource contains written, spoken, or sung words for which there are sources of information in more than one language or script, prefer (in this order):
   (a) the source in the language or script of the written, spoken, or sung words if there is only one such language or script or only one predominant language or script.
   (b) the source in the original language or script of the resource if the words are in more than one language or script, unless translation is known to be the purpose, in which case use the source in the language of the translation.

12.1. Title and Statement of Responsibility Area

12.1B. Title proper

12.1B1. Transcribe the title proper as instructed in 1.1B.

Correct obvious typographic errors when transcribing the title proper and give the title as it appears on the resource in a note. In case of doubt about whether the spelling of a word is incorrect, transcribe the spelling as found.

12.1.B2. When the title appears in full and in the form of an acronym or initialsism in the chief source of information, choose the full form as the title proper.

LC rule interpretations. LC/PCC practice: Prior to Dec. 1, 2002, this rule called for the selection of the acronym or initialsism as the title proper if it was the only form of the title presented in other locations. Do not change any existing bibliographic or series authority records created before Dec. 1, 2002.

12.1B3. In case of doubt that whether a corporate body’s name or an abbreviation of that name is part of the title proper, treat the name as such only if it is consistently so presented in various locations in the resource and/or as found in indexes, abstracts, or other sources.

12.1B4. If a resource is a separately published section of, or supplement to, another resource and its title proper as presented in the chief source of information consists of

a) the title common to all sections (or the title of the main resource

and

b) the title of the section or supplement

and if these two parts are grammatically independent of each other, give the common title followed by the section or supplement title preceded by a full stop. In such a case disregard the order in which the parts of the title proper are presented in the chief source of information.
12.1B5. If the title of such a section or supplement (see 12.1B4) is preceded by an enumeration or alphabetic designation, give the common title, followed by the designation, and the section or supplement title.

12.1B8. Change in title proper

a) Serials. If a major change in the title proper occurs, make a new description (see 21.2C). If a minor change occurs in the title proper on a subsequent issue or part, in general, give the later title in a note (see 12.7B4.2).

21.2. Changes in Titles Proper

21.2C. Serials

21.2C1. If a major change occurs in the title proper of a serial, make a new entry.

21.2C2. Definition of major and minor title changes for serials

a) Major changes. In general, consider as a major change in a title proper of a serial the addition, deletion, change, or reordering of any of the first five words (the first six words if the title begins with an article) unless the change belongs to one or more of the categories listed in 21.2C2b.

iii) a difference involving the name of the same corporate body and elements of its hierarchy or their grammatical connection anywhere in the title (e.g., the addition, deletion, or rearrangement of the name of the same corporate body or the substitution of a variant form).

**LC rule interpretations:** In applying category b) iii), if the change is in the name of a body that is part of the title proper and the change requires the creation of a new heading for the body (cf. 24.1C), consider such a change to be a major change. Consider the presence or absence of the name or title of the official of the body to be a minor change. Consider the presence or absence of the body to whom a publication is presented to be a minor change.

iv) the addition, deletion, or change of punctuation, including initialisms and letters with separating punctuation vs. those without separating punctuation, anywhere in the title.

v) a different order of titles when the title is given in more than one language in the chief source of information, provided that the title chosen as title proper still appears as a parallel title.
vi) the addition, deletion, or change of words anywhere in the title that link the title to the numbering

vii) two or more titles proper used on different issues of a serial according to a regular pattern

viii) the addition to, deletion from, or change in the order of words in a list anywhere in the title, provided that there is no significant change in the subject matter

ix) the addition, deletion, or rearrangement anywhere in the title of words that indicate the type of resource such as “magazine,” “journal,” or “newsletter” or their equivalent in other languages. (*NOTE: A change of words from one type of resource to another is a major change.*)

**LC rule interpretations:** In applying category b) ix), note that the change from one word to another (e.g., the change from "magazine" to "journal") is a major change. The word "series" does indicate a type of resource. A word denoting frequency (e.g., "monthly") does not indicate a type of resource.

12.3C. Chronological designation

12.3C1. If the first and/or last issue or part of a serial is identified by a chronological designation, give it in the same terms, but not necessarily with the same punctuation, used in that issue or part. Use abbreviations as instructed in appendix B and numerals as instructed in appendix C. For serials that have ceased publication, see 12.3F.

362 0# $a 1990-
Choosing the Chronological Designation: When choosing the chronological designation, considering the type of date(s) given on the item. The chronological designation may represent the approximate time of publication (e.g., the May 1990 issue of a monthly), the coverage of the contents (e.g., fiscal year 1990), or the date of a meeting or event. An identifying date that reflects the publishing of the serial may be used as a chronological designation when there is no numeric designation to identify each issue and the publication is more likely to bear a formal chronological designation on subsequent issues; if the date is a copyright date, supply a chronological designation based on that date but do not use the copyright date as such. Also see 12.3D.

If more than one expression of a chronological designation is given, prefer a designation given in the title proper and give a note if the coverage is different. For publications of events when both a general date (e.g., year alone) and a specific date are given, prefer the general date. If more
than one presentation of the designation is given in or with the title proper, prefer the most
concise presentation. (See also LCRI 12.3.)

However, if the designation consists of a year and a number that is a division of the year, give the year before the number.

**LC rule interpretations 12.3C4.** Record a chronological designation only when it contains additional information. If the separate date lacks the year present in the other designation, record the year twice without brackets.
12.3D. No designation on first issue or part

12.3D1. If the first issue or part of a serial lacks any numbering, but subsequent issues or parts define a designation pattern, supply numbering for the first issue or part based on that pattern. If information about designations of subsequent issues or parts is not available, give [No. 1]-(or its equivalent in the language of the title proper) or a chronological designation for the first issue or part, as appropriate.

CONSER Cataloging Manual, Module 8, 8.5.1.

12.3E. Alternative numbering, etc., systems

12.3E1. If a serial has more than one separate system of designation, give the systems in the order in which they are presented.

**LC rule interpretations 12.3E1.** Record a second or third system of numeric and/or chronological designation with the first system if it, too, identifies the issue (cf. rule 12.3B1). Prefer to record as the first a system that uses the form of volume number and internal number. If more than one numeric system is recorded, generally record the chronological system with the first numeric system (cf. rule 12.3C4).

Give in a note information about a second or third system of numeric/alphabetic designation that does not identify the item (cf. rule 12.7B10.2) whenever the second or third system appears prominently enough on the publication for one to assume that the serial may be asked for by that system.

12.3G. Change in numbering
12.3G1. If the numbering starts a new sequence with a different system, give the designation of the first and/or last issues or parts under the old system, followed by the designation of the first issue or part under the new system.

If a new sequence is accompanied by wording to differentiate the sequence, such as *new series*, include this wording. Distinguish such wording from that of a section title that is to be placed after a common title (see 12.1B4–12.1B6).

If a new sequence with the same system as before is not accompanied by wording such as *new series*, supply *[new ser.]* or another appropriate term (or its equivalent in the language of the title proper).

12.7. Note Area

12.7B. Notes
Make notes as set out in the following subrules and in the order given there. However, give a particular note first if it has been decided that note is of primary importance. Notes may include information not appropriate to other areas of the description or reflect changes in the resource over time.

If the resource being described is a reproduction, give also details of the original (see 1.7A4, 1.11F, and 11.7B22).

**CONSER Cataloging Manual 17.7.4.**

**b. Reprint note:** Record in a single note (field 580) the publishing details of the original, the frequency (when known), and any other pertinent details.

12.7B10. Numbering and issuing peculiarities

LC rule interpretations 12.7B10. CONSER standard and minimal record practice:
It is not required to use prescribed abbreviations or standardized capitalization when giving this information. Numbers given as words may be transcribed as words or recorded as Arabic numerals.

If a serial has a new sequence of numbering (cf. 12.3G), give information about the sequence in a 362 field or a 515 field, whichever is clearer.

12.7B10.1. If the period covered by a volume, issue, etc., of an annual or less frequent serial is other than a calendar year, give the period covered.

12.7B10.2. Change in numbering. Make notes on complex or irregular numbering not already specified in the numbering area if considered to be important (see 12.3G). Make notes on issuing peculiarities if considered to be important.
