21.30G1. Make an added entry under the heading for a work to which the work being catalogued is closely related (see 21.8-21.28 for guidance in specific cases).

In such a case, the heading is that of the person or corporate body or the title under which the related work is, or would be, entered. If that heading is for a person or body, and the title of the related work differs from that of the work being catalogued, add the title of the related work to the heading to form a name-title added entry heading. When necessary, add the edition statement, date, etc., to the name-title or title added entry heading.

When appropriate, substitute a uniform title (see chapter 25) for a title proper in a name-title or title added entry heading for a related work.

21.30H1. Make an added entry under the heading for any other name that would provide an important access point unless the relationship between the name and the work is purely that of a
subject. For example, make added entries under the name of a collection from which reproductions of art works have been taken or under the heading for a collection of books upon which a bibliography is based.

When possible, formulate headings for such names by analogy with corporate name headings.

ANNOUNCEMENT: SERIES AT THE LIBRARY OF CONGRESS: JUNE 1, 2006

On June 1, 2006, the Library of Congress implemented its decision not to create/update series authority records and not to provide controlled series access points in its bibliographic records for resources in series.

With the exception of those categories listed below, LC will create bibliographic records for all resources in series and assign "classed separately" call numbers (i.e., a specific call number appropriate to the topic of each resource).

In newly-created bibliographic records for LC original cataloging (040 $a is solely "DLC"), the series statement will be given in a 490 0# field. LC will not use the 042 "pcc" code in any record for a monograph or integrating resource.

In newly-created CIP-partnered cataloging, in PCC member copy used for cataloging, and in non-PCC copy cataloging, existing series statements/access points will be accepted as is and "passed through." If the other library's call number is a "collected set" call number (i.e., series numbering included at end of subfield $b), that call number will be retained in the record as a 050 14 field.

LC's revised decision to "pass through" series access points when found on records used for copy cataloging will significantly reduce the number of situations when an LC-issued record without series access points might overlay a record in OCLC that has series access points.

However, OCLC is still investigating the issue of how to protect controlled series information in the following situations: (1) when LC distributes a new version of an LC record with a 490 0 series statement and the OCLC version has been enhanced, or (2) when there may be an existing WorldCat record with controlled series information for the same title for which LC has done original cataloging.

Series bibliographic maintenance will be restricted to adding or correcting series statements (490 0#); controlled access points (440/8XX fields) won't be added or modified.

The PCC Policy Committee has announced that the PCC series policy remains unchanged. The Library of Congress will continue to delete duplicate series authority records reported by PCC participants and by other libraries. LC will continue (1) to answer questions for PCC participants creating and updating series authority records and (2) to process error reports and answer questions from other libraries if doing so doesn't involve research, e.g., retrieving resources from the collections.

LC is prepared to continue to coordinate and conduct series training for PCC participants; LC and the PCC Steering Committee will be discussing this topic.

Revisions of the four "basic" Library of Congress Rule Interpretations have been posted on this site as PDF files. Links to these files are provided here: LCRI 1.6 [7 p. 137 KB] -- LCRI 13.3 [3 p. 173 KB] -- LCRI 21.30L [8 p. 210 KB] -- LCRI 26.5A [14 p.; 325 KB]

Other documentation, revised during June and July, will also be posted and will be included in the November update of Cataloger's Desktop, etc.

For more information (including the codes in 040 and 042 fields), see the PCC series FAQ.

Exceptions to the LC series policy to analyze in full and classify separately:

1. The following categories will not be analyzed and will be classed as a collection; series authority records will not be consulted, created, or updated:
   - Numbered multipart monographs with all parts lacking analyzable titles
   - Unnumbered multipart monographs cataloged per "2A cataloging" guidelines ("2A cataloging" is a local LC practice to create a made-up collected set record for an unnumbered multipart monograph, assigning numbers to parts as received)
   - Auction and sales catalogs
   - Legal multipart monographs identified by LC's Law Library
   - Numbered monographic series already assigned these treatment decisions prior to June 1, 2006 (issues identified by presence of check-in records in acquisitions units)

2. The following category will not be analyzed and will not be classified; series authority records will not be consulted, created, or updated:
   - Technical report series identified by LC's Science, Technology, and Business Division or LC's Asian Division and shelved in those divisions

3. The following categories will be analyzed in full but will be classed as a collection; series authority records will not be consulted, created, or updated:
   - Scholarly collections of music historical sources eligible to be classed together in M2
"Web access to monographic series" project in LC's Social Sciences Cataloging Division

Microform sets

Proceedings of a single conference published in more than one volume with analyzable volume titles

Legal monographic series and multipart monographs identified by LC's Law Library

4. The following category will be analyzed in full: applies to analyzable parts and will be classed as a collection; series authority records will not be consulted, created, or updated.

Complete editions of collected work of individual composers (classed in M3)

5. Existing LC shelflist records missing in LC's database now being input to the database: the records will reflect the existing series decisions (i.e., presence or absence of controlled series access point; a classed-separately or a classed-as-a-collection call number) at the time the resource was cataloged originally.

21.30M. Analytical entries

21.30M1. Make an analytical added entry under the heading for a work contained within the item being catalogued (see 21.7B-21.7C, 21.13B, and 21.15A for guidance in specific cases). Make additional analytical entries in accordance with the policy of the cataloguing agency. See also Chapter 13.

In such a case, the heading is that of the person or corporate body or the title under which the work contained is, or would be, entered. If that heading is for a person or body, add the title of the work contained to form a name-title added entry heading. When necessary, add the edition statement, date, etc., to the name-title or title added entry heading.

When appropriate, substitute a uniform title (see Chapter 25) for a title proper in a name-title or title analytical entry heading.
