Names vs. Subject Authority File: Heading required As a Descriptive Authorized Access Point (DCM Z1, Appendix 1)

o Group two headings -

PCC Catalogers: If a Group 2—Subject Authority Group heading is **being used as an access point**, create a name authority record according to subject cataloging rules. **Add a 667 note to the NAR with the statement "Subj. Headings Manual/RDA."**

If a Group 2 Subject Heading for the same entity exists in the LCSH File create an NAR (cf. DCM Z1 Appendix 1: Ambiguous Entities, Section, 3.1) and send a notification to PTCP (policy@loc.gov) to delete the existing subject authority record.

Names vs. Subject Authority File: Heading required As a Subject (H405)

○ Group two headings -

Heading required for subject cataloging purposes

First search to determine whether the entity has already been established as a name heading according to former guidelines. After making this determination, proceed as follows:

- (1) **Name authority record not found:** Submit a subject proposal.
- (2) **RDA or AACR2 name authority record found:** If the record does not have a 667 field with the notation Subj Headings Manual/RDA , consult the Policy, Training, and Cooperative Programs Division to determine whether it should be canceled as a name heading and re-established as a subject heading.
- (3) **Pre- AACR2 name authority record found :** Submit a proposal to establish it as a subject heading, as described in sec. 1.a., above. Notify the Policy, Training, and Cooperative Programs Division of the invalid name heading so that the name authority record can be deleted.

Choosing and Recording the Preferred Name (11.2.2.3- 4)

- Choose the name by which the corporate body is commonly identified
- Record it as it appears in resources associated with the body. If the name does not appear in resources associated with the body, or in case of doubt, record it in the form most commonly found in reference sources

Change of Name, Minor Differences (11.2.2.5)

- Guidelines on identifying minor changes of name. Consider minor differences in the absence of explicit evidence that a true name change has taken place, such as:
 - Representation of words
 - Change in preposition, article, or conjunction
 - Change in punctuation
 - Addition, omission, or fluctuation of a frequency word in a conference name

Different Forms of the Same Name (11.2.2.5)

- Choose the name that appears in the preferred sources of information
- Choose the form that is presented formally
- Choose the most commonly found form of the name
- Choose a brief form

Different Forms of the Same Name

Different Language Forms

(11.2.2.5.2)

- Choose as the preferred name the form in the official language of the body
- LC-PCC PS: If there is more than one official language and one of these is English, choose the form in English as the preferred name

Special Rules for Corporate Bodies in Hong Kong

- Government body
 - Establish in English if both English and Chinese available, and in Chinese if only Chinese available
 - Code “provisional”
- Non-government body
 - Establish in English if both English and Chinese available
 - Code “full level”

LC-PCC PS, 11.2.2.14.6, #2--Subfield Coding for Subordinate Units under 411

- LC's machine does not accept multiple subfield \$e under authority field 411, despite *MARC21 format for authority data's* specification and Connexion Client's validation. LC's instruction issued to OCLC is to enter multiple subordination hierarchy under single 411-\$e and to place a comma between each element inside that single 411-\$e. *e.g.*,

Conference Name Location

Qualifier : Place Name (11.3.2.3, 11.3.1.3)

- Record a name of place in which the conference, etc., was held by following the instructions at 11.3.1.
- If the conference, etc., was held in more than one place, record the names of each of the places in which it was held.
 - Alternative*: If the conference, etc., was held in more than one place, record:
 - a) a name of place primarily associated with the conference, etc. (e.g., a host city) *or*
 - b) the name of the larger place or places in which the conference, etc., was held.
- Do not include the type of jurisdiction or other designation

Conference Name Location

Qualifier : Institution (11.13.1.8)

- Add the name of the associated institution instead of the local place name if:
 - the institution name provides better identification, or
 - the local place name is not known
- When adding the name of an institution as the location of a conference, record the preferred name for the institution, minus any additions used in the institution's authorized access point

Ongoing Conferences (LC-PCC PS 11.13.1.8)

- Separate NARs may be created for the collective conference (typically made when cataloging serial), an individual instance of an ongoing conference (typically made for a monograph), or both. These records may coexist in the NACO file.
- A record for the collective conference should always be made to connect the earlier and later names of the collective conference.
- Once an official name of a conference is chosen, the names for all NAR should have the same name.

Access Point for a Series of Conferences, Etc. (11.13.1.8.2)

- If the access point represents a series of conferences, etc., do not add the number, date, or location of the conferences, etc.
- Be careful not to confuse a “Place associated with a corporate body” added to distinguish different conferences with the same name with a location of a conference.

Access Point for a Series of Conferences, Etc. (11.13.1.8.2)

- Connect authority records for earlier and later names of the collective conference using 5XX field
- Include a 667 field when there are authority records for both collective and individual instances of an ongoing conference

Conference Name and Its Associated Bodies

- Often, establishing a corporate body name or a conference name authorized access point involves updating and modifying the associated authority records. Research often is needed in order to decide the relationship among the different names.

Earlier Name Resumed (LC-PCC PS 32.1.1.3)

- Treat each instance of the name as a separate body when a corporate body resumes an earlier form of name. Distinguish between AAPs by following the instructions at 11.13.1.1

NAR 1: 110 2# \$a Body A (1937-1949)

510 2# \$w r \$i Successor: \$a Body B \$4
<http://rdaregistry.info/Elements/a/P50016> \$0
[authority URI] \$1 [RWO URI]

NAR 2: 110 2# \$a Body C (2001-)

510 2# \$w r \$i Predecessor: \$a Body B \$4
<http://rdaregistry.info/Elements/a/P50012> \$0
[authority URI] \$1 [RWO URI]

Note: Body A and Body C share the same name.

Earlier Name Resumed (LC-PCC PS 32.1.1.3)

- **However**, use one authorized access point to represent all instances of the same name when a corporate body belongs to one of the following categories, and include a 667 field in the NAR about the decision made. Add other clarifying info. in the 667 note if useful
- **Note:** If a body has already had separate AAPs created for the earlier and resumed names, it is not required to retrospectively collapse the separate AAPs into one AAP

Earlier Name Resumed (LC-PCC PS 32.1.1.3)

- **Category A - Bodies of a Type Likely to Be Subject to Frequent Name Changes**

Use one authorized access point to represent both the earlier and resumed name, if a body is likely to have frequent name changes because of its nature (e.g., firms named after individual members, legislative committees, conferences)

Category A Example

111 2# \$a IEEE Workshop on Advanced Robotics and its Social Impacts

511 2# \$a IEEE International Conference on Advanced Robotics and its Social Impacts \$d (2008 : \$c Taipei, Taiwan)

667 ## \$a This conference resumed its earlier name; the name IEEE Workshop on Advanced Robotics and its Social Impacts was used 2005-2007 and 2009- present. The name IEEE International Conference on Advanced Robotics and its Social Impacts was used in 2008

Earlier Name Resumed (LC-PCC PS 32.1.1.3)

- **Category B - Place Names**

Use the same authorized access point for both the earlier and resumed name provided the additions to the AAP are appropriate for each instance, when a place resumes its earlier name

Category B Example

151 ## \$a Saint Petersburg (Russia)

551 ## \$a Leningrad (R.S.F.S.R.)

667 ## \$a This place resumed its earlier name;
Leningrad resumed the name Saint
Petersburg in 1991.

151 ## \$a Leningrad (R.S.F.S.R.)

551 ## \$a Saint Petersburg (Russia)

Note: also reflects change of name of the larger place

Earlier Name Resumed (LC-PCC PS 32.1.1.3)

- **Category C - Bodies with Complex and Uncertain Histories**

If a body has had a complex or uncertain history, and creating and applying separate authorized access points for each use of the same name is not feasible, use the same authorized access point for both the earlier and resumed name

Category C Example

110 2# \$a Republican National Committee (U.S.)

510 2# \$a National Union Executive Committee
(U.S.)

667 ## \$a This corporate body resumed its earlier name; the Republican National Committee began in 1856. It used the name National Union Executive Committee beginning in 1864 until sometime around 1868.

Earlier Names Not Likely to be Needed as Relationships (32.1.1.3)

- If the earlier names of a corporate body that are not likely ever to be needed as access points in bibliographic records, and the decision is made not to create NARs for the earlier names, record them in the 670 along with an indication such as **[no publications in LC database]** or **[no access point found in OCLC]**

Relationships Between Agents (RDA 29-32, Appendix K)

- PCC guidelines for the application of relationship designators in NACO authority records
(<https://www.loc.gov/aba/pcc/rda/PCC%20RDA%20guidelines/PCC%20SCS%20SCT%20Relationship%20Designators%20in%20NACO%20Authority%20Records-2018-11.docx>)

Recording Relationships Between Agents

- Relationship designators should only be used to relate authority records in the LC/NACO Authority File
- Do not use relationship designators in 4XX fields
- Do not use a RD if a specific relationship cannot be determined. Instead use simple see-also from tracings (5XX). Consider adding a 667 field to indicate that research has been done

Recording Relationships : 510 – See Also From Tracing

- LC/PCC catalogers may use subfield \$i with subfield \$w coded “r” to provide relationships between corporate entities and
 - the names of other persons, families or corporate body, or
 - authorized access points for works or expressions
 - use terms from Appendix I, J, or K in subfield \$i
 - use a capital letter for the first letter of the term and follow the term with a colon
- this technique may also be used to related authorized access points for works and expressions containing corporate names
