

## Pattern Headings: Organs and Regions of the Body H 1164

**PATTERNS:** Foot; Heart

**TYPES OF HEADINGS COVERED BY THE PATTERN:** Headings for internal or external parts of the human or animal body, including organs and organ systems, tissues, and anatomical regions. *Examples:* **Abdomen; Abdominal aorta; Bill (Anatomy); Central nervous system; Face; Femur; Gums; Hypothalamo-hypophyseal system; Intestine, Small; Middle ear; Nails (Anatomy); Nerves, Peripheral; Urinary organs.** Also included are headings for parts of the body divided by anatomical subdivisions, for example, **Brain–Ventricles; Leg–Blood-vessels.** Not covered are headings for cellular or subcellular constituents, for example, **Erythrocytes; Sex chromosomes;** and the general headings **Human body; Organs (Anatomy);** and **Tissues.**

**CONFLICTS:** Any subdivision listed here can be used as a free-floating subdivision under any heading belonging to the category if it is appropriate and no conflict exists in the subject authority file. Subject authority records may exist for headings employing variant phrases or subdivisions equivalent to subdivisions on this list.

*LC practice:*

If an exceptional variant form is to be retained, make a UF reference from the equivalent free-floating subdivision form following the procedures in H 195 if the reference does not yet exist. Otherwise, submit a proposal to change the variant form along with all bibliographic records requiring correction following the procedures in H 193.

**SPECIAL PROVISION:** Subdivisions on this list that represent diseases, injuries, or other pathological conditions, for example, **–Abnormalities; –Abscess; –Cancer; –Diseases; –Fractures; –Necrosis; –Tumors; –Ulcers; –Wounds and injuries** may be further subdivided, as appropriate, by subdivisions from the pattern list for diseases (H 1150). Further subdivisions established in the subject authority file under **Heart** or **Foot**, for example, **Heart–Diseases–Diagnosis** and **Foot–Wounds and injuries–Chiropractic treatment**, have been removed from the list below.

*Note: Most form subdivisions coded \$v in this list may also be used as topical subdivisions coded \$x when assigned to works **about** the form (see H 1075, sec. 1.d.).*

\$x Abnormalities<sup>1</sup> (May Subd Geog)

\$x Abscess<sup>1</sup> (May Subd Geog)

\$x Acupuncture (May Subd Geog)

\$x Adaptation (May Subd Geog)

### NOTES

<sup>1</sup>See H 1150 for further subdivisions used under diseases.

<sup>2</sup>Not established under **Heart**. Use **Myocardium** for the muscular substance of the heart.

<sup>3</sup>Not established under **Heart** or **Foot**. Use under other organs and regions of the body as appropriate.

<sup>4</sup>See H 1154.5 for further subdivisions used under legal topics.

<sup>5</sup>See H 1100 for further subdivisions used under classes of persons.

<sup>6</sup>Not established under **Heart**. Use under parts of the body other than **Brain** and **Heart**. For ultrasonic imaging of the brain, use **Ultrasonic encephalography**; for ultrasonic imaging of the heart, use **Echocardiography**.

<sup>7</sup>May be subdivided topically by a religion or Christian denomination. Editorially establish each heading of the type *[part of the body]–Religious aspects–[name of religion or denomination]*. For instructions on the use of the subdivision, see H 1998.
