

Relationship labels

Work to Place

In addition to the relationship elements listed here, NARs for Works may record relationships related to Corporate body for Places that represent jurisdictions.

[related place of work](#)

Definition: A place that is associated with a work.

PCC relationship label: ***related place***

Inverse: [related work of place](#).

[coordinates of cartographic content](#)

Definition: A place that is the area of coverage of a cartographic work that is described using a mathematical system to identify its boundaries or location. Coordinates may be expressed by means of longitude and latitude on the surface of planets or by the angles of right ascension and declination for celestial charts.

PCC relationship label: ***coordinates of cartographic content***

Inverse: [coordinates of cartographic content of](#)

[description of place](#)

Definition: A place that is described by a work.

PCC relationship label: ***description of***

Inverse: [place described in](#)

[longitude and latitude](#)

Definition: A place that is the area of coverage of a cartographic work that is identified using the longitude of the westernmost and easternmost boundaries and the latitude of the northernmost and southernmost boundaries.

PCC relationship label: ***longitude and latitude***

Inverse: [longitude and latitude of](#)

[place of capture of representative expression](#)

Definition: A place that is associated with recording, filming, etc., the content of a representative expression.

PCC relationship label: ***place of capture of representative expression***

Inverse: [place of capture of representative expression of](#)

[place of origin of work](#)

Definition: A place from which a work originated.

PCC relationship label: ***place of origin of work***

Inverse: [place of origin of work of](#)

[right ascension and declination](#)

Definition: A place that that is the location of a celestial body that is the coverage of a cartographic work and is identified using the angles of right ascension and declination.

PCC relationship label: ***right ascension and declination***

Inverse: [right ascension and declination of](#)

strings of coordinate pairs

Definition: A place that is the area of coverage of a cartographic work that is identified by a polygon using coordinates for each vertex.

PCC relationship label: ***strings of coordinate pairs***

Inverse: [strings of coordinate pairs of](#)

subject place

Definition: A place that a work is about.

PCC relationship label: ***subject***

Inverse: [subject place of](#)
