Notes

1. The letter 𑒛 is used with “checked” (voiceless) consonants and indicates a change in pronunciation. It is written following four consonants only, the letters 𑒊, 𑒌, 𑒎, 𑒕, which are romanized *g*, *j*, *d*, and *b* respectively.
2. The mark ' (a dot written above the line after a vowel) is used to indicate nasalization and is romanized as *n̄* after the vowel it modifies. Another mark, . (written below the line after the vowel it modifies) is used to indicate low pitch and is omitted in romanization.

Other Marks Used in OI Script

1. The mark \sim , written over a letter, is used to indicate the prolongation of a vowel. It is omitted in romanization.
2. The mark $\bar{\text{~}}$ (similar to a hyphen) is used to separate “checked” consonants from other consonants or vowels. It is omitted in romanization.
