regulate after to her wants on to his enjoyments. And shough it p 2.21. get the progresse un provement of the lands of the former might, hould be here, that in fitted countries, the Lycipfication in the end, above for an inferior degree of children in the of houthy a conducine to an energy in the productive pour mean time: and in a cafe in which opposite confideration. of labour and to an augmentation of revenue and capital are pretty equally balanced, the option ought perhaps always get it is juriely concerveable that there can be any of the ded and primarent advantage to to be in favour of leaving Inouthy to its our Derector. But the fighten which has been mentioned an undultward and unperflet country as to whatled to walter and the last fell and the last and inhabite u far from characterising the general policy of Nations Shuts. If the Revenue, in he mean time, thould be find words June rather to gain that to lafe ground. ap, the Capital, in the went, much be greater auto a contain extent in the peteration of a county preducted to thep officiations, the following appears to from foreign commence. They are indeed inthout sufficielly be a fatiffactory an five when from about the manufactured Juffles, fouther 1 If the for fifteen of perfect they are in want , but they opherionice numerous, and wenty to industry and commerce were the prevailing viry injurious improvements to the emission and vent of leften of nations - of they one very when reft to there any commorthere. No is the the cafe in reference bearing out, the arguments which deffuade a country, in the predicament of the Whales, from the zealous with which we rave the most of tension intercomp purpose of manufactures would doubtle have great show lowour offluctions in the way of the prenapal paper force. It will not be affirmed, that they might not be furnetted, with fow exceptions, to five as a of the United Fales . In fuch a position of things, the whe of national conduct. In fuch a place of theres Unelid tales cannot openange in the Europe on equal tormo each esuntry while have the full benefit of its - and the want of receprocely would peculiar advantages to compensate for its defection ces or them the violen of a fifteen, which should induce then desarrantages. If one nation, will in andition to to angine then news to Agriculture and refrain from upply manufactured articles on betta term than manufactures. A constant and increasing necessary or another, that other might find an abundant indemnie then hart for the commodities of Europe, and only a feeder in a fuperior capacity to furnish the produce partial and occasional demants for their our in return of the soil. And a free wohange, meeterally beneficial, and not but tophop then to a state of impossission of the commodities which each was able to Jupply, on the left soms, might be carried on between i compared with the opulance to what their political and approxing in full vegace the industry of each natural novantages authorize them to affine. Ind though the arlampanees which have Romarks of this kind are not made mentioned and others what will be unfolded in the Spent of complaint. "Tio for the nations, while hereafter under it probable, that nations merely regulations are alluded to to judge for themselber Agricultural would not enjoy he fame degree whether by aiming at too much they to not lop more than they gain. The for the United Nalu 'f spulence, in proportion to their numbers, as to whoe by Wwhat means they can under them from Who which united manufactures with agreculture;

last dependent on the wholever just a wrong, of ? The conveytion of their waste into cultivate lands is wrowing a point of great moment on the pullback calculations the United States. But the degree in which the may be proffely be retarded by the approximant encouragement of manufactories don not appear to counterval the founder inducement, to affording that enoungement . In observatur made in another place is of a nature to have great influence upor this quetter. If it cannot be sonice that the interests even of Agreealline may be advanced more by having such of the lands of attale as are occupied, under good cultivation, than by having a quater quantity occupied under whether early inter; and if nanufactories for the affigued, mittle be admitted to have a kindency to promote a more pearly and organous authoration of the lands occupied, than would happed without them - it will follow, that they are ahable of indemnetying a country for a siminution of the property of new atterments; and may fine to week lith the capital value and the income of the lands, of assaha, since though they prouted are alonge the number of aires bunda "Tillage". But it does by no means follow, had the progret, of new fe Hemento would be retarded by the optenfor of manufactures. The define of being in ndependent proprietor of lands is founded on fuch

1 222. Thing principles in the human heaft, that where the opportunity of burning fo is as great as it is in the United States, the proportion arte be small of those, whose pheralions would other wife lead to it, was who would be directed, from it towards manufactures. And it is highly proper already intimated, that the acceptions of foreigne agenally have over by manufackning very work afterwards abandon them for Agricultural about more than an equipment for those of our own aligno, who might rapper to be detached from them. The remaining objections to a particula encouragement of manufactures in the United Nates now require to be opamined. one of these tums on the proposition that noughy, if left to itself, will naturally sind its how troople way to the most refetal and profetable employment: * Against the politity of the hypothesis infacture what wa in the full Catericle of the torme, very cogent reasons may no ofgreen - se offered. They have relation to - the flooring influence of habit and the shiret of metalion interfine fear of want of maderal to be full effage lowards a compete from who have previously attained to perfection in the before was place of to be attempted - the bounters premiums and other arke cial incouragements with which foreign nations found wh of the the gertions of her our alizans on the way hanches, in muruly may which they are to be rivalled. Experience teaches, that men are after to much governed by what they are accustomned to bee and practice, that the peoplet and most obscore improvements, in the male ordinary occupations, are adopted get suffation relictance and by flow gradations. It what the postancing was communed the postancing and to I new purposes in a community tong have have to deferrent onio may be specific a sended with proportion and greater difficulty. When former excupations dealed to would a profil adequate to the som Jubb flence of their following an her there was an abfolute defeciency of employmen
